Pothole detector in flooded condition

Abhinandan Kumar
Class 9, Raj Stariya
Uchh Vidyalaya
West Champaran, Bihar

Joshita Sharma
Class 9, Jesus and
Mary School Chelsea
Shimla, Himachal Pradesh

Eshanika Priyadashini
Class 6, Bal Bharti School
Delhi

When the road gets flooded during rains, it becomes very difficult to ascertain if there are any open drains, manholes or potholes under water, resulting in many accidents. The students have individually thought about an idea to have a device in vehicles, which could detect such openings on road so that accidents can be prevented.

Abhinandan likes watching news/current affairs based programs and playing cricket. He wants to become the Prime Minister of the country so that he can contribute to the development of the country. With an interest in astronomy, Joshita also likes paragliding, poetry and social work. She has also formed an association named Baal Manch along with her friends. With keen interest in space, she wants to become an astronaut. Eshanika likes to play mobile games, badminton and carrom. She wants to become a Doctor, so that she can help the poor and needy.
