---	---	---

Problem addressed: Mealy Bugs are considered pests as they feed on plants and also act as a vector for several plant diseases. Infested plants will stop growing, take on a sickly appearance with distorted stem and grow point deformation and start to shrivel. Our product helps to prevent infestation of Mealy bugs in our useful crops, thereby helping farmers to avoid losses due to pest attacks.

Product :
This herbal composition is specially formulated to control the mealy bugs. By controlling the growth of bugs, these herbal compositions contribute to high yield in the crops and plants. These are 100% natural and organic compositions are highly effective and can be used for industrial, commercial and domestic applications. We offer mealy bug controlling compositions in different packaging, which can be customized as per the specific needs

Key Competitive Advantage:	<ul style="list-style-type: none"> • Available at affordable price. • Easy to use. • No harmful effects on land.
