

Milk Enhancer in Animals

We offer a complete line of herbal products, which are particularly milk enhancer compositions. These milk enhancer compositions do not affect the balanced nutrition of the milk. They are 100% natural, organic and purely herbal enhancers. They simply enhance the ruminant digestibility to a better extent, which promote the production of milk generating hormones naturally. This ensures no side effect to the animals. Moreover, it is cheaper than traditional, expensive and harmful chemicals.
